What are the specification requirements for LA eCrash?

Eric Newman - 2022-01-18 - eCrash

The system requirements for Louisiana eCrash are the same as the Windows 10 operating system requirements. Those are detailed here: https://www.microsoft.com/en-us/windows/windows-10-specifications.

For overall user experience, we would suggest a minimum of 4 GB of RAM. Also, keep in mind crash reports are stored on the user's machine so hard drive space should be taken into consideration. For overall user experience, 64 GB of hard drive space should be available for the LA eCrash, MOVE, and MapClick applications.
